

GOVERNANCE · RISK · COMPLIANCE

**MyCISO**

The Security Operating System  
for CISOs and security leaders

# Stop managing cyber risk in spreadsheets. Start governing it properly.

myCISO is an award-winning, cloud-based GRC platform that turns cyber governance into a structured, measurable and auditable program — **assess your maturity, prioritise the risks that matter, and prove it to your board and auditors** from one place.

65+ security frameworks

Board-ready reporting

AI-prioritised roadmap

Delivered locally by SecureCentral

## WHY GRC CAN NO LONGER WAIT

Regulators, boards and customers now  
ask the same question: **prove it.**

## 90% error rate

Spreadsheet-based GRC carries a high risk of errors, data loss and compliance failure — with no version control, change tracking or auditability.

### Rising regulatory load

PDPA, MAS TRM, Bank Indonesia, APRA CPS 234/230 and Essential Eight all demand evidence, not intent.

### No single source of truth

Assessments, risk registers, policies and evidence scattered across files — so nothing is current and nothing is provable.

### Third-party exposure

Your suppliers are your attack surface. Manual vendor reviews cannot keep pace with supply-chain risk.

### Boards want numbers

Executives need maturity scores, trends and progress — not a 60-page consultant report that is stale on arrival.

## myCISO makes GRC a repeatable operating rhythm — not an annual fire drill.

A guided journey takes you from **goals** → **controls** → **risks** → **strategy**. Answer plain-English questions, get an automatic maturity score against your chosen framework, and receive a prioritised improvement roadmap ranked by the most risk reduced for the least effort. Switch frameworks at any time and your scores carry across — no re-work.

**65+**

Security frameworks supported out of the box

**1**

Platform for assess, risk, suppliers, culture & incidents

**5**

APAC markets with local presence: AU · NZ · SG · MY · ID

**17+**

Years of regional security & managed services heritage

## ONE PLATFORM, SIX DISCIPLINES

# Everything a security program needs — connected.

Start with Assess and add modules as your program matures — every module feeds the same maturity score, risk register and reporting engine.

### Assess

Guided, workflow-driven maturity assessments across 65+ frameworks, with automatic score carry-over when you switch lenses.

### Manage

Centralised risk register, security metrics and incident management so leaders can track performance and act on what matters.

### Suppliers

Criticality-based third-party risk assessments with automated tracking and real-time collaboration across your supply chain.

### Culture

Multi-year awareness strategies, video training, phishing simulations and behavioural metrics that build real security habits.

### Vulnerabilities

External and internal scanning across 200+ and 300+ data points to uncover exposures, pre-fill assessments and rank remediation.

### PrecogAI

AI-driven analytics that prioritise your roadmap by risk reduced per unit of effort — and turn raw data into decisions.

**Comply once, report many ways** Map your controls to the frameworks your regulators, customers and board care about.

## YOUR AUTHORISED PARTNER IN THE REGION

# Global platform. Local delivery. One accountable partner.

### Authorised myCISO partner

SecureCentral is the **authorised myCISO partner across Asia Pacific** — licensing, onboarding, enablement and support are handled locally, in your time zone and your language.

### Built for APAC regulation

Tailored implementation for regional obligations including **PDPA, MAS TRM, Bank Indonesia and APRA**, backed by advisers who know these markets.

### myCISO as-a-service

Advisory-led managed security services wrapped around the platform — so you accelerate security maturity **without traditional consulting costs**.

1

### Discovery call

30 minutes to confirm your drivers, framework and scope.

2

### Guided demo

See your framework in the platform with real reporting output.

3

### Onboard & baseline

We stand up your tenant and run your first maturity assessment.

4

### Improve & report

Track uplift quarterly and issue board-ready reports on demand.

*The ability to switch frameworks so easily lets me quickly change the reporting lens without needing to re-invent the wheel or spend half my life on repeat in Excel.*
