SECURE CENTRAL
A Pioneer Infotech Company

REGIONAL DISTRIBUTION & SUPPORT
ASIA PACIFIC · SOUTHEAST ASIA

MANAGED DETECTION & RESPONSE

HUNTRESS

Managed cybersecurity that finds and stops threats.

Enterprise-grade protection for the lean IT teams running **Southeast Asia's** small and mid-sized businesses — powered by a **24/7 AI-centric SOC**, deployed and supported in-region by SecureCentral.

24/7	5M+	15M+	277k+
AI-CENTRIC SOC COVERAGE	ENDPOINTS PROTECTED	IDENTITIES PROTECTED	ORGANISATIONS SECURED

ONE PLATFORM · ONE DASHBOARD · ONE SOC

The Huntress Agentic Security Platform

Endpoints, identities, logs and learners — unified, and watched around the clock.

ENDPOINT
Managed EDR
Detection and response handled end to end — from the second a threat appears until it is eliminated.
- **Industry-leading MTTR**

IDENTITY
Managed ITDR
Stops account takeover, BEC and session hijacking across Microsoft 365 and Google Workspace.
- **3-minute MTTR**

LOGS & COMPLIANCE
Managed SIEM
Security-relevant log retention, search and reporting — at a predictable price, fully managed.
- **Audit-ready evidence**

HUMAN RISK
Managed SAT
Security awareness training built on real threat intel that employees actually finish.
- **98% completion rate**

POSTURE
Managed ISPM
Continuously closes Microsoft 365 misconfigurations, risky access and policy drift.
- **Drift fixed in ~15 minutes**

POSTURE EARLY ACCESS
Managed ESPM
Proactive endpoint hardening against ransomware and infostealers.
- **Shrink the attack surface**

TIME TO VALUE	OPERATING SYSTEMS	CLOUD & IDENTITY	ECOSYSTEM
Minutes, not months	Windows · macOS · Linux	Microsoft 365 · Google Workspace	RMM, PSA & ticketing

24/7
AI-CENTRIC SOC

Real analysts, at machine speed. Huntress pairs its agentic AI analyst with human threat hunters, so you receive plain-English incident reports a tier-one technician can act on — not a queue of raw alerts. **No AI surcharge, no separate SKU.**

THE SOUTHEAST ASIA THREAT REALITY

A growth market for your business — and for organised cybercrime.

Attackers no longer chase zero-days. They run standardised, profit-driven playbooks against exactly the profile of business that fills this region: cloud-first, Microsoft 365-heavy, cross-border, and supported by an IT team of three.

277%
Surge in RMM tool abuse — now 24% of all incidents

37.2%
Of identity attacks begin with stolen or shady access

18.9%
AiTM phishing that walks straight through MFA

51.3%
Of ransomware from just four crews

Source: Huntress 2026 Cyber Threat Report — telemetry from 4.6M+ endpoints and 9.4M+ identities across 230,000+ protected organisations.

WHY IT LANDS HARDEST HERE

- **Lean IT teams.** One or two generalists carrying servers, helpdesk, networks — and security.
- **Microsoft 365 saturation.** Fast cloud adoption without matching identity monitoring.
- **No 24-hour watch.** Operations across SG, MY, ID, TH, PH and VN, but nobody on at 3am.
- **Budget reality.** Enterprise SOC pricing does not fit an SMB cost base.

WHAT CHANGES IN THE FIRST 90 DAYS

- **Threats found faster.** Suspicious activity investigated before it escalates.
- **Response, not just alerts.** Experts act when a genuine threat is confirmed.
- **Gaps closed.** Endpoints, identities, email and Microsoft 365 in one platform.
- **Evidence on hand.** Reporting your auditors, insurers and board will accept.

WHY SOURCE HUNTRESS THROUGH SECURECENTRAL

12+
Years of APAC distribution

8
Markets served across Asia Pacific

17+
Years of managed IT heritage since 2008

50+
Years combined team experience

DELIVERED & SUPPORTED ACROSS

Singapore · Malaysia · Indonesia · Thailand · Philippines · Vietnam · Australia · New Zealand

Certified pre-sales architects, deployment and tuning, and regional first- and second-line support in your time zone. SecureCentral is a company of Pioneer Infotech Singapore — ISO/IEC 27001:2022 certified and a CSRO-licensed provider for managed SOC monitoring (CS/SOC/C-2024-0407) and penetration testing (CS/PTS/C-2024-0522).

Find out what is already hiding in your environment.

Start with a 30-minute conversation, then prove it with a time-boxed trial on your own endpoints and Microsoft 365 tenant.
